

MEHTAB BADWAL

Senior UX Designer | AI & Platform Experience

mehtabbadwal@gmail.com | +1 619-302-1735 | mehtabbadwal.com/ | linkedin.com/in/mehtabbadwal/

SUMMARY

Senior UX Designer with 6+ years building AI-powered platforms, internal tools, and 0→1 products for expert users who can't afford friction. I design for the complexity — not around it — translating dense systems into interfaces that are faster to navigate, easier to act on, and built to scale with engineering.

WORK EXPERIENCE

Staff Product Designer | *Rooms, Remote*

- Jan 2026 – Present

- Led UX for a 0→1 AI-powered project management product, conducting 3+ rounds of end-to-end usability testing with 18+ users from onboarding through finished state, identifying and resolving critical workflow gaps before launch
- Achieved real-world product validation pre-launch, with early users independently building and completing projects inside Rooms, confirming the core experience model works without guidance
- Designed core user flows for expert users managing complex multi-phase project structures, including task access model and collaboration roles, **reducing critical interaction paths from four taps to two**
- Built Rooms Design System from scratch — color tokens, typography, 20+ components, and screen patterns — establishing a scalable foundation for engineering handoff
- Proactively identified user workflow gaps through research synthesis and contributed feature direction that expanded product capability pre-launch, influencing the product roadmap beyond the initial design scope

UX Designer | *HPE Aruba Networking, Remote*

- Sep 2024 – Nov 2025

- Shaped conversational AI experiences for technical power users in an enterprise support context — defining progressive disclosure, loading states, and interaction patterns at high fidelity — **reducing tickets by 25% and live agent calls by 30%**; framework adopted across 3 products
- Built predictive analytics dashboards for expert operators, structuring filters, data hierarchies, and action surfaces to maximize signal clarity and **increase customer renewal rates by 15%**
- Owned end-to-end visual and interaction design for Virtual Accounts and Premium Services, translating complex account relationship models into clean, navigable interfaces that **reduced setup time by 20%**
- Prototyped interaction patterns at high fidelity using Figma, Lovable, and Claude — validating system behavior and edge states with engineering before handoff, **reducing design cycle time by 40%**
- Led cross-functional design collaboration across Product and Engineering; designed responsive desktop, tablet, and mobile workflows ensuring consistent behavior across breakpoints

Lead UX Designer | *Stealth Startup, San Diego, CA*

- May 2024 – April 2025

- Designed AI-powered fintech platform enabling analysts to query large datasets via natural language — defining expert-user interaction patterns for AI-driven workflows — **reducing research time by 60%**
- Built data-heavy dashboards that translated complex financial datasets into clear, actionable business insights, **reducing manual prep by 40% and review time by 70%**
- Collaborated with product, data scientists, and engineers to define system behavior for AI interactions, supporting 0→1 platform adoption

Senior UX Designer | *Fluidra, Carlsbad, CA*

- Oct 2022 – March 2024

- Designed mobile and web applications for IoT-connected hardware, **boosting app adoption by 35%** and increasing engagement among service technicians through targeted usability improvements
- Established design system standards and component library using design ops methodology, reducing inconsistencies and improving team scalability across multiple product workstreams
- Led unmoderated usability testing and A/B evaluations synthesizing qualitative insights that **reduced task completion time by 25%** while meeting WCAG 2.1 AA accessibility standards
- **Mentored junior designers** in design thinking and heuristic evaluation practices, establishing design quality standards and ensuring consistency across the product portfolio

User Experience and Interaction Designer | *H&H Solutions, Consulting*

- July 2019 – Oct 2022

- Designed scalable UX systems and 100+ wireframes for native iOS and Android applications following platform-specific design patterns, **improving accessibility compliance by 25%** and strengthening brand cohesion across client products
- Built centralized design system with component library and design tokens; **mentored a team of 6 designers** in design thinking and best practices, establishing quality standards across client projects

SKILLS

Product & UX Design

Complex / Data-Heavy Systems Design, Interaction Design, Information Architecture, Design Strategy, User Research, Usability Testing, A/B Testing, Heuristic Evaluation, Accessibility (WCAG 2.1)

Systems & Platforms

Design Systems, Component Libraries, Responsive & Adaptive Design, Native Mobile UX (iOS & Android), Cross-Platform UX, iOS HIG

AI & Data-Driven Design

Data Visualization, Dashboard Design, Conversational AI, Generative AI, AI/ML Integration, Predictive Analytics, Responsible AI, AI-Assisted Prototyping (Lovable, Cursor, Figma Make, Claude Code)

Tools & Delivery

Figma, Adobe Creative Suite, Jira, Confluence, Agile/Scrum, Stakeholder Collaboration, Design Ops

Leadership

Cross-functional Collaboration, Stakeholder Communication, Mentorship, Design Facilitation

EDUCATION

USER EXPERIENCE DESIGN CERTIFICATE

- Jan 2021 – April 2021

General Assembly, San Diego, CA

MASTERS IN BUSINESS ADMINISTRATION

- 2014 - 2016

United States University, Irvine, CA

FASHION DESIGN

- 2012 - 2014

Fashion Institute of Design and Merchandise, Los Angeles, CA
